

Q.layer

Q.LAYER

The Q.layer profile is a LED profile for use in offices and genareal area's. This profile offers a variety of mounting possilites. Recessed or suspended.

Due to the modern LED's this fixture offers the best efficiency available. Colour temperatures can be selected from 2700K up to 6500K. Multiple white is also available.

The driver is fitted inside this profile, therefore installation is plug&play.

The opale diffusor has a unique "cutout". This means the diffusor sticks out 12mm, therefor the beam angle is extra wide, and you have a unique feature.
