

Q.inside

Q.inside

The Q.inside was designed in collaboration with DEP Nederland. This is a variety on our existing Q45 fixtures. Only now with the lightsource on the inside of the ring.

With these rings you can make beautiful set's. The standard finishing is black or brass. The sets can also have rings without light. These fill up the set's and give it some extra character.

The pendant sets can make a impressive statement in high rooms/hall's.

As an option we produce a special ceiling base plate which makes installation Plug&Play.
